

Legioplate®

We build solutions

Legioplate®

We build solutions

Legioplate® are heavy weight interlocking concrete plates. Each plate has a safe working load of 20 tons. The unique design of the Legioplate come from Europe where they have been successfully and widely used since 1937.

Legioplate® are the optimal solution for a rapid and a flexible construction. The plates are easily placed, without the need of cement or any other bonding agent. This allows complete freedom to modify or expand the plates at any time and any place. Plates can be loaded immediately, there is no need for curing time.

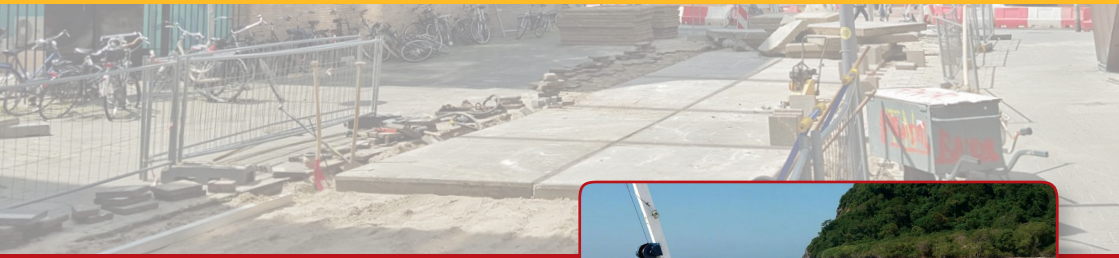

Market place

Secondary road

Legioplate® can be removed and relocated at any time which makes them ideal for both permanent and temporary applications. This ultimate flexibility and durability offer a highly cost-effective solution.

Legioplate® are the ideal solution for the construction of factory floors, parking lots, roads, market places, temporary building access roads, cycling paths, port facilities, road repair and many more.

Port usage

Placing the plates

Legioplate® have short lead times. The plates can be placed directly from the delivery trucks. This allows you the possibility to have a floor structure in only a matter of hours. After soil preparation the plates can be used immediately.

Jansen Concrete Products offers a complete service package including design, static calculations, transport and an expert installation. This way you have only one point of contact for the realization of your entire project.
